

NCFE Cache Level 2 Certificate

PRINCIPLES OF DEMENTIA CARE

Be 19+ at the beginning of the academic year

Lived within the EU for the last 3 years

Live in London and earn less than the London Living Wage

In the UK, dementia affects about 820,000 people. It is anticipated that by 2025, there would be one million and by 2051, two million. It costs the UK more than £26 billion annually and is one of the primary causes of impairment in later life. Research on the subject is also woefully neglected. The cornerstone of providing high-quality care is an understanding of dementia and the need for person-centered care.

Benefits

- Obtain a nationally recognised Level 2 qualification
- Demonstrate to potential employers that you are competent
- Advance your professional and personal development
- Improve your understanding of the various forms of dementia and the importance of being respectful at all times
- Learn whenever it is convenient for you, without having to go to college.

What you will learn

- Awareness of Dementia
- The Person-Centred method for supporting and caring for people with dementia
- Interaction and communication with people suffering from dementia
- Recognise inclusion, diversity, and equality in dementia care
- Recognise how to administer medication to dementia patients using a person-centered approach.
- Recognise behaviour in the dementia context
- Recognise the advantages of participating in social care activities
